What I've Built

What I Can Build For You

I build modern and scalable web apps using React, Next.js and Node.js — tailored for businesses and individuals.

From database to user

Home Service Projects

and Zod.
like Supabase, Prisma, Clerk,

Complete online store
solutions with product listings,
shopping cart, order tracking,
and admin/user dashboards.

Custom-built admin panels to
manage users, content, and
analytics — fast, secure, and
user-friendly.

Reusable component systems.
Using Tailwind CSS and
Clean, responsive, and fast UIs

Convert old static or frontend-
only sites to full-stack Next.js
applications with improved
performance and SEO.

Secure login, registration, and
role-based access control
using modern tools like Clerk
and Supabase Auth.

Build and integrate RESTful
APIs with backend services
and third-party platforms.

Let's Make Something Awesome

Great things start with a simple hello—so if you're thinking about a project or just want to bounce around some ideas, let's connect!
