## SUMMARY

Software Engineering graduate with strong technical experience in full-stack web development and process automation. Passionate about DevOps, CI/CD, and system deployment, with hands-on experience integrating APIs, automating workflows, and deploying scalable applications. Eager to contribute to production environments, streamline delivery pipelines, and ensure system reliability.

## TECHNICAL SKILLS

**DevOps & Tools:** Azure DevOps (beginner), Git, Docker, PowerShell, Bash, n8n Automation, Vercel CI/CD

**Programming:** JavaScript (ES6+), Python, PHP

**Web & Frameworks:** Node.js, Express.js, React, Next.js, Tailwind CSS, shadcn/ui

**Databases:** Supabase, PostgreSQL, MongoDB, MySQL, SQL Server (basic queries & backups)

**Cloud & APIs:** Supabase Auth, Meta Graph API, Google Slides API, Airtable

**Testing & Debugging:** Manual Testing, Troubleshooting, API Validation with Postman

**Operating Systems:** Windows Server (basic administration), macOS,

## SOFT SKILLS

- **Analytical Thinking** – Able to identify system bottlenecks, evaluate risks, and propose efficient solutions.
- **Problem Solving** – Skilled at debugging, troubleshooting, and resolving deployment or automation issues.
- **Team Collaboration** – Work closely with developers, QA, and business teams to ensure smooth delivery pipelines.
- **Communication** – Clearly translate technical concepts to non-technical stakeholders and document processes effectively.
- **Adaptability** – Quickly learn new tools, environments, and technologies under tight deadlines.
- **Attention to Detail** – Ensure precision in configurations, scripts, and documentation.
- **Time Management** – Prioritize multiple deployment and automation tasks to meet delivery timelines.
- **Continuous Learning** – Stay updated with DevOps, CI/CD, and automation trends to improve system efficiency.

## EXPERIENCE

### Automation & Deployment Developer — Bold-Pro Marketing Agency

- Designed n8n automation workflows to integrate Meta Graph API with Airtable for automated analytics and reporting.
- Built CI-like processes for data syncing, report generation, and daily API checks, improving reliability by 40%.
- Collaborated with marketing teams to deploy dashboards and automate repetitive reporting tasks.

### Full-Stack Developer — Project-Based Work

- Developed and deployed full-stack applications using Next.js, Node.js, and Supabase, focusing on performance and uptime.
- Integrated authentication, database management, and automated deployments via Vercel pipelines.
- Created real-time dashboards and automation scripts that reduced manual data entry.

### Banking Simulation App — University Project

- Built and deployed a Flask-based system simulating transactions, balance tracking, and authentication.
- Practiced debugging, SQL queries, and backend logic — core skills for DevOps troubleshooting.

---

## EDUCATION

### Mutah University

Bachelor's Degree in Software Engineering  
2020 - 2024

---

## CERTIFICATIONS

- Full-Stack Web Development — Pathway
- Testing Fundamentals — Education for Employment (EFE)
- Automation with n8n — Leads Alchemy
